Date	03 July 2026
Team ID	SWTID-2026-9440
Team Size	4
Team Leader	Bodanapu Sai Krishna Reddy
Team Member 1	Anand Ch
Team Member 2	Singam Hemasree
Team Member 3	Damavarapu Sanjana
Project Name	Machine Learning—Based Credit Card Approval Prediction System
Maximum Marks	4 Marks

Introduction

The Project Executable Files document describes the executable components, machine learning models, templates, and supporting resources required to succ Learning–Based Credit Card Approval Prediction System. These files colle execution, machine learning prediction, user interaction, and database connectivity.

Prx»ject Executable **Files**

configumt:ion ation files, trained required to run the Machine saæcesstülly run tl•kž enable application files collectively

Executable Cornponents

	Executable Compoment	Description	Purpose
	app.py	Main Flask application	Stalls the web amlication cc:xmdinates all
2	nx»del.pkl	Trained Machine Learning Mo&l	Ci2.rEtates credit card approval predictions.
3	encgxiers.pkl	Label Encoder File	Converts categorical input into values.
4	scaler.pkl	Feature Scaling Elle	Normalizes inlNt features trfote prediction.
5	requirements.txt	Python Dependency File	Installs all required packages. project libraries and
6	templates/	HTML Template Folder	Contains the web interface pages for interaction-
7		JavaScript and Image Folder	Provides styling, client-side fUnctionality, and static resources.
8	README.nxi	Boject Thxurxrntation	installation instructions,] project overview. and execution steps.

Execution Requirvnwnts

Programming Language	Python 3.x
Web Framework	Flask
Machine Learning Libraries	• Scikit-l • Pandas • NumPy
Database	MySQL
Development Environment	Visual Stu
Version Control	Git and G
Deployment Platform	Render wit
Operating System	Windows 1

Ih-oject Execution

Install Project Dependencies
↓
Configure Database
↓
Load Trained Machine Learning Model
↓
Launch Flask Application
Open Web Browser
↓
r_Ä44in
↓
AprAieant **cant Details**
↓
Machine Learning Prediction
↓
Display Approval or Rejection Result

Conclusion

Key Features of Executable Files

- Modular project structure.
- Easy application deployment.
- Secure machine learning model loading.
- Efficient database integration.
- Responsive web interface.
- Scalable Flask architecture.
- Reusable software components.
- Simplified maintenance and future enhancements.

Workflow

The of the Credit Card Aprmoval Bediction System a nxxlular, and nvaintainable sofixvaœ solution. Togetluer, the Flask trained leaming ex»nfiguration files, tenplates, and static ensure reliable application execution xcurate real-tine credit card approval prediction.
